## "Impressions" - Marge Heilman

"Monet's Giverny and rolling fields of southeast France generated excitement, anxiety, curiosity, discovery, peace, recognition and appreciation. In returning to Trinity County, my uppermost thought is, What lessons does Monet have for the artist in this area of mountains, clean air and blue-green palette?"

## "Pathway of Time and Space" - Mel Jackson

Scott Valley was a palette, and Mel's senses were the canvas. The mountains that ringed the Valley were sculptures of time and space. Forty-five years later the tops of those same mountains provide the inspiration for his latest work; a series of paintings of the Pacific Crest Trail as it passes through Lassen, Shasta, Trinity, and Siskiyou counties.

## "Shape Up!" - Kimberly Piazza

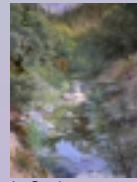

Car Jacking

Kimberly's work addresses environmental issues, both via the recycling of materials used in her work, and through the "recycling" or abstraction of photographic images taken during her visits to junkyards. She transforms the debris she gathers from industry's wasteland as a way of addressing the overarching theme of her creative endeavors: humankind's impact on the natural environment.

## "Emergence" - Lisa Brey Randolph

"Often a feeling state will suggest imagery. I am amazed when I allow internal truth to have expression creatively. The art is not always pretty or tidy but I experience great personal satisfaction in allowing the inside out. Emergence is composed of silk, cotton, organza, tulle, gold and bronze foil layered and burned."
